HH909 EVO5 DUAL SWITCH VENTED WITH CR2 REFLECTIVE HELMET

CONFORMITIES/STANDARDS

EN 397, EN 50365, EN 12492, ANSI / ISEA Z89.1.

DESCRIPTION

• EVO5 DUAL SWITCH VENTED WITH CR2 REFLECTIVE HELMET Robust and lightweight ABS shell for excellent head protection. Expanded polypropylene (EPP) liner offers impact protection to the side, front and rear. Shell and liner are vented to allow airflow and keep wearer cool. Fully adjustable four-point chinstrap which can be switched between two modes. For working at ground level, the chinstrap will self-release when force between 15-25kg is applied (EN 397 mode). For working at height, the chinstrap will self-release when force is over 50kg (EN 12492 mode). Revolution wheel ratchet and 3D adjustment harness allow the wearer to find the ideal fit. Euro 30mm slots allow the addition of accessories. Conforms to: Working on the ground – Switch up: EN397, EN50365, ANSI / ISEA Z89.1. Working at height – Switch down: EN12492, ANSI / ISEA Z89.1.
